## THE UNIVERSITY OF TEXAS MD ANDERSON CANCER CENTER

**Pink Palace of Healing • 1954 • Texas Medical Center**

Healed for the first 50 years in a converted wooden house, the main building at the University of Texas Medical Center.

A few **LOCAL DOCTORS VOLUNTEERED** their services during wartime.

The **first research was conducted by scientists** during the war.

Remarkable progress was made in the early years of the center.

## Monroe Dunaway Anderson *The Man, The Foundation*

Monroe Dunaway Anderson was born in June 1873, in Jackson, Texas, to manhood and obtained business experience as a banker. After a few years of banking and entered the cotton business with his brother, Frank E. Anderson, and boyhood companions, William L. and Benjamin Clayton. Through their efforts, Anderson Clayton & Co., became the foremost cotton merchandising firm in the world.

In 1907, Anderson, Clayton, and Frank E. Anderson, through the efforts of the first cancer research fund, established the first cancer research fund in the world. The fund was named the "Anderson Clayton & Co. Cancer Research Fund" and was the first of its kind. The fund was the first to provide financial support for cancer research.

During the construction of the original building, the Andersons had a vision for the future of the center. They wanted to create a place where the best minds in the world could come together to study and cure cancer. This vision led to the creation of the University of Texas MD Anderson Cancer Center, which is now one of the leading cancer research and treatment centers in the world.
